

Scientific Computing :: Drop In

Arne Pommerening

Session: 9

Date: 07 December 2018

Activity: Quizzes, questionnaires and exams in R

Quizzes, questionnaires and exams in R

One of the many other things you can do with R is to design quizzes, questionnaires and exams. various packages have been written to use these functionalities, see for example <http://www.r-exams.org/> and <https://rstudio.github.io/learnr/>. This can, of course, also be extended to scientific applications where you collect research data online.

Today we will have some fun and do a little Xmas quizzy. First we will do this altogether using the GUI. Then you can download the source code from <https://github.com/apommerening> (go to “Scientific-Computing-Drop-In” and folder “Session 9”) entitled `Session9Quiz.R`.

Now your task is to “play around” with `Session9Quiz.R` in such a way that you create your very own Quiz.
